

IS HARD WATER COSTING YOU MORE Than You Think?

Hard Water Out Smart Living In

www.mizuion.com

HARD WATER CONTAINS EXCESS

CALCIUM & MAGNESIUM, WHICH CAUSES:

1

Hair fall & dull hair

2

More soap, Shampoo & Detergent usage

3

White scale on taps & tiles

4

Poor Water Pressure

5

Damage to geyser & washing machine

6

High Maintenance Cost

7

Dry, rough skin

What Is MIZUION Electronic Water Conditioner?

MIZUION is a **non-salt, non-chemical electronic water conditioner** that uses advanced Anode Cathode technology

No salt

**Japanese
Cathode-
Anode
Technology**

**Safe for
daily use**

No Magnet

**1000-4000
LPH Capacity**

**No water
wastage**

No chemicals

**Zero
Maintenance**

Smart & Powerful Features

- Power settings: Low | Medium | High
- 4.3" Touch Screen Display with Auto-Clean Mode
- Rod size: 30 x 1000 mm
- Pipe inlet: 2 inch | Pipe outlet: 2 inch
- Power consumption: Only 1 unit per 2 hours

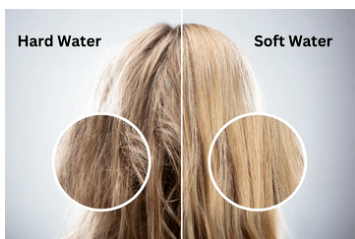

**STAINLESS
STEEL ROD**

**MIXED METAL
OXIDE ROD.**

For Your Body

- Soft & smooth skin
- Reduced hair fall
- Shiny, manageable hair
- Better bathing experience

For Your Home

- No scale on bathroom fittings
- Shiny tiles & glass
- No stains on clothes

KEY BENEFITS

For Appliances

- Longer geyser & washing machine Life
- Better heating efficiency
- Less maintenance & repair cost

For Your Industry

- Prevents hard scale buildup in pipelines and machinery
- Reduces cleaning and maintenance costs
- Keeps operations running smoothly

How MIZUION Anode-Cathode Technology Works

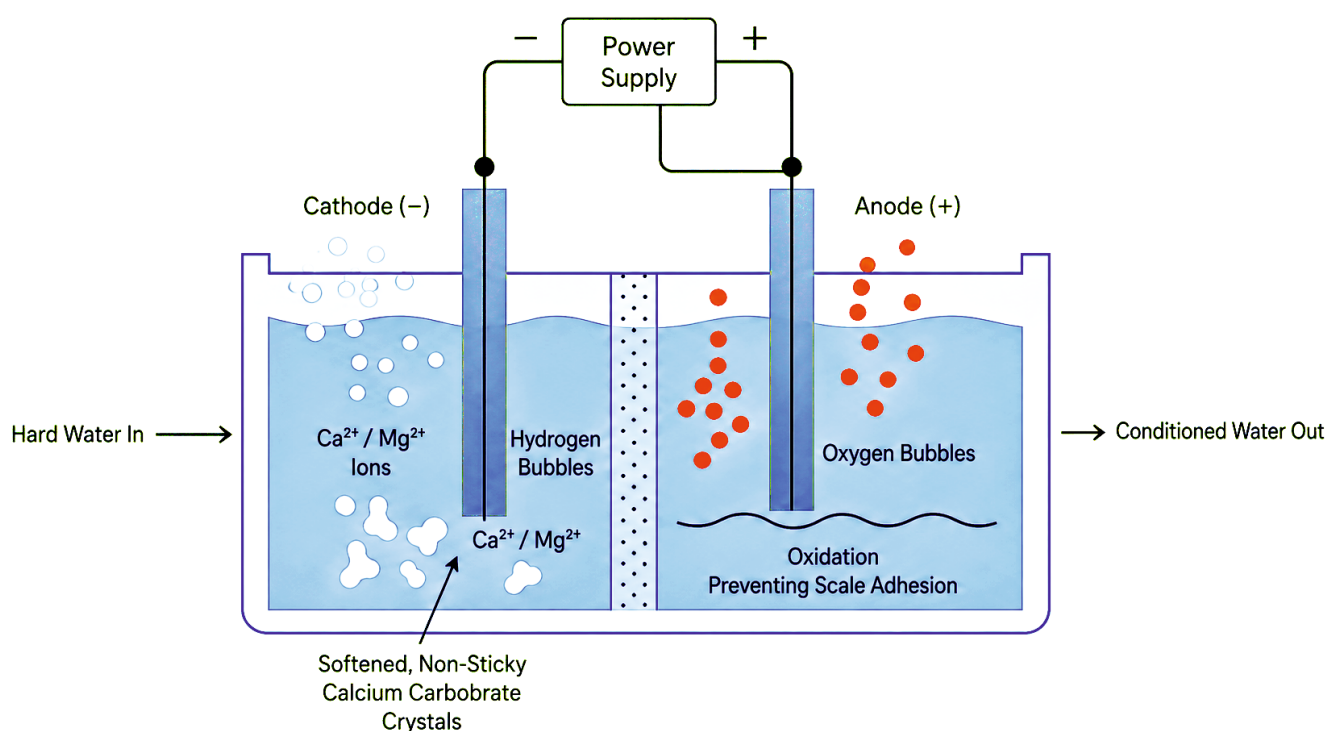

MIZUION Water Conditioner uses advanced anode-cathode electrochemical technology to control hard water scaling without using salt or chemicals.

When hard water flows through the MIZUION chamber, a low-voltage electric current is applied between the anode (+) and cathode (-) electrodes.

At the cathode, calcium and magnesium ions responsible for hardness are attracted and their crystal formation behavior changes. Hard, sticky scale-forming crystals are converted into soft, non-adhesive structures.

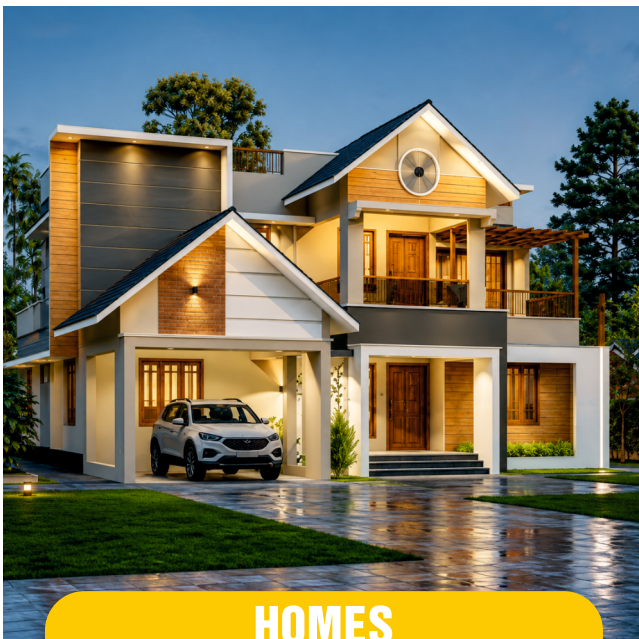

At the anode, controlled oxidation reactions help prevent mineral bonding on pipe walls and heating surfaces. Hydrogen and oxygen micro-bubbles formed during the process assist in loosening existing limescale deposits.

“MIZUION Convert hard water by electrochemically altering mineral crystallization, preventing scale adhesion without removing essential minerals.”

IDEAL FOR

MIZUION Electronic Water Conditioner is ideal for homes, apartments, villas, salons, hotels, offices, hospitals, and commercial spaces where hard water causes scaling problems. It is perfect for protecting geysers, water heaters, washing machines, plumbing lines, and bathroom fittings, while providing a maintenance-free, eco-friendly solution without using salt or chemicals.

Comparison:

MIZUION vs Salt Softener

MIZUION Electronic Conditioner	Salt Softener
No salt required	Requires salt
No water wastage	High water wastage
No maintenance	Regular maintenance
Eco-friendly	Not eco-friendly
Easy installation	Complex setup

WHERE CAN IT BE INSTALLED?

- Main inlet line
- Terrace
- Utility area
- Before overhead tank
- Individual appliances

IDEAL FOR

- Homes & Apartments
- Villas & Bungalows
- Salons & Spas
- Hotels & Restaurants
- Commercial buildings

WHY GO ELECTRONIC?

-  Save water
-  Save money
-  Save energy
-  Protect appliances
